## *Welcome to Renaissance Evolution*

*"Embracing Renaissance Ideals in the Modern World"*

Respect for the dignity and worth of the individual, pursuit of achievement in the sciences and arts, and cultures that provide freedom for all people and promote open expression of ideas are the foundation for prosperous and fulfilling cultures.

I founded Renaissance Evolution to promote these ideals and enhance their understanding and utilization in our world today.

At Renaissance Evolution, we work with people from all walks of life - business, arts, government, religion, sports, and more - to shine a bright light on these ideals and those individuals striving to make a positive difference.

Roberto Masiero, Ph D.  
Founder and President
